

**pro-line**

*All that the name implies...*

**W**elcome to the world of Pro-Line!

*Designed for the family who likes to go offshore, Pro-Line boats are built for sea duty. They are better equipped than they need to be, but not loaded down with extras. The result is a handsome, well designed craft, easy to maintain, economical to buy and to own.*

*All Pro-Lines are solidly built fiberglass, with molded inner liners, mechanical steering, thru-bolted hardware, foam flotation, bow rails, and the famed Pro-Line destroyer steering wheel.*

*If you are serious about having fun, you are certain to find the Pro-Line you want on these pages.*

## ***17 Sport Fisherman***

The spirited 17 Sport Fisherman catches everybody's eye.

It's beefy, very handsome, and fully capable of doing just about any kind of boating you could ask. It carries 30 gallons of fuel for long, long cruising, and it can be powered any which way you want — up to 120 horse outboard, with Pro-Line's new Plus 2 Drive (pictured above right) or, if you can believe, a 120-hp I/O! (lower right.)

Is it any wonder that everybody loves the 17?

# 20 Sport Fisherman

The culmination of better than 10 years of constant improvements, the 20 Sport is near to perfection in a center console family fishing boat. The solid-looking craft is a modified-V to permit working close in, but it's also a powerhouse ready to range far offshore.

A Bimini top heads an impressive list of standards, including durable aluminum frame windshield, twin helmsman seats, extra large teak step pads, and recessed rod holder storage.

With 55 gallons of fuel and outboard power to 150, the 20 Sport is always ready.

As if to flaunt her wholesome lines, the 17 Sport Fisherman (left) slides home through the evening calm.

# 23 Sport Fisherman

The 23 Center Console has all the needed sea-keeping qualities for blue water performance.

Fuel capacity is a practical 90 gallons, and power can be anywhere up to a 235-hp outboard, or up to 185-hp sterndrive. And, of course, all models can utilize Pro-Line's Plus 2 Drive.

The 23 features an outstanding list of standards, including raised casting platform forward, built-in fish boxes (left), handsome center console with lockable radio cabinet, tinted windshield, and the Pro-Line trademark, destroyer-type steering wheel.

The new Pro-Line 21 features the same classic lines, the same rugged dependability, and the successful deep-V bottom design of the larger Pro-Lines.

# The Deep-V Walkarounds

The robust 23 Walkaround is a star performer judged by any standard. It offers the safety and comfort of deep V hulls for fishing or boat handling; the wide open spaces of a walkaround for serious angling; a snug, airy forward cabin when the crew wants to overnight or hide from the weather; and, finally, the handling ease of a deep-V hull that's easy to maintain.

Standards on both the 21 (left) and the 23 Walkarounds include sun top, recessed rod storage racks, twin helm seats, tinted and vented safety glass windshield, and lockable teak cabin door. Still more standards are very comfortable, Herculon covered, plaid cabin cushions in brown and blue tweed, removeable splash board, battery enclosure with teak door.
