The Offshore Walkaround 28

All Pro-Lines are designed for the family who likes to go offshore. Built for sea duty, you might say. But never before has there been a boat like the new Offshore Walkaround 28.

The 28 is far more than just a big Pro-Line. It is fast and responsive, but it is also solid and comfortable. And those deep wide walkarounds give the "yachty" feel of a large cruiser.

Her designers gave the 28 a wide 10'6" beam, and as a result, in addition to the huge walkarounds, the handsome craft sports a large airy cabin with 6'3" headroom and full standup head!

Standards? The 28 has them all: Tackle cabinets, 50-gallon fish box, 236 gallons of fuel, Bimini top, yes, and trim tabs. Pro-Line's Plus 2 System is standard, but options are available in either single or twin stern drive or twin V/6 Sea Drive.

The Offshore Walkaround 28 is Pro-Line deep-V "to the max."
The robust 23 Walkaround has established itself as a star performer judged by any standards. It offers the safety and comfort of deep walkarounds, a wide open cockpit for serious fishing, a snug airy cabin, and, finally, the maneuverability of an easy to maintain deep-V hull.

The 23 Center Console has all the needed sea-keeping qualities for blue water performance and features an outstanding list of standards including raised casting platform forward, large built-in fish boxes, lockable radio cabinet, tinted windshield, and the Pro-Line trademark, destroyer type steering wheel. Sun top, rod racks, and stainless steel rails are standard on both models.

Fuel capacity is a very practical 90 gallons, and power can be anywhere up to 235-hp outboard on the standard Plus 2 Drive. Sterndrive and V/4 or V/6 Sea Drive are available as options.
Smallest of the Pro-Line family of deep-V's, the 21 Walkaround nonetheless offers the same rugged performance of the larger models and the big side wings that provide maximum passenger comfort and protection from the elements.

Standard equipment offered on the 21 also compares with the bigger boats and includes the Bimini top, recessed rod storage racks, twin helm seats, tinted and vented safety glass windshield, Herculon covered plaid cushions in blue tweed, stainless steel rails and the Pro-Line destroyer wheel.

Power to 200-hp is available in the outboard version with 70-gallon fuel tank standard.

With all this, the 21 Walkaround has to be the most economical walkaround available anywhere.
In production only a short time, the 21-A Cuddy Cabin has had very enthusiastic response, and understandably. The boat is remarkable. As the result of a brilliant interior design, Pro-Line engineering has created an enormous cabin where a large crew can retreat from wind and sea. They have also achieved added storage and the exciting new Pro-Line bow rail configuration. And all this while still retaining most of the security and efficiency of wide walkarounds. With all its styling, the 21-A Cuddy doesn't forget it's a deep-V with a brawny hull and all the needed equipment for going to sea. Included as standard are sun top, twin helm seats, tinted and vented safety glass windshield, Herculon covered plaid cushions in blue tweed, stainless bow rails, and battery enclosure with teak door. Standard power is the same as the 21 Sport Fisherman at 200-hp for the outboard plus all the stern drive and Sea Drive options. The 21-A Cuddy is a great boat for fishing, but just as great for family cruising fun.
The 20 Sport Fisherman

The 20 Sport Fisherman is brand new from its beautifully flared bow to a husky wide stern. The 20-footer can run offshore, but it's equally at home when it comes time to work the flats. The big 20 has all the standards: Two large fish boxes, stainless steel bow rails, recessed rod storage racks, twin helm seats, and more.

The 20 carries 55 gallons of fuel and can be powered up to 140-hp in straight outboard, more with Plus 2 or Sea Drive. With its wide beam and modified-V hull, the 20 Sport Fisherman is truly the perfect mid-range fishing boat.

It's little wonder that the 17 Sport Fisherman has such universal appeal. It's beefy, very handsome, and fully capable of doing just about any kind of boating you could ask. It carries 30 gallons of fuel for long, long cruising, and it can be powered up to 120 horse outboard or, would you believe, either 120- or 140-hp stern drive! (See inset photo.)

The 17 also has standards galore including twin helm seats, stainless steel bow rails, lockable radio cabinet behind sliding plexiglass doors, casting platform forward, and a cold drink/fish storage well.
The World of Pro-Line.

One look at any of the Pro-Lines and you can believe they were designed for families who like to go offshore. Pro-Line boats are also better equipped than they need to be, but not loaded down with extras. The result is a handsome, well designed craft, easy to maintain, economical to buy and to own.

All Pro-Line hulls are traditionally hand laid fiberglass, with molded inner-liners, mechanical steering, thru-bolted hardware, foam flotation, stainless bow rails, and the famed Pro-Line destroyer steering wheel.

Our boats are built in Crystal River, Florida, right on the Gulf of Mexico, by families who would rather fish than do anything else. For over 18 years, they have enjoyed a reputation for imaginative design, thorough construction techniques, and reliability.

We hope you were able to find on these pages the boat you have been looking for — and will go to sea with Pro-Line.
