AMERICA IS GOING PRO

“Pro-Line introduces a new measure of quality - with FIST”

FIST (Fiberglass Integrated Structural Technology) is a superior boat building process that utilizes a fiberglass stringer system and high density Divinycell Foam coring in place of wood. It's the highest standard for the construction of rugged fishing boats and only Pro-Line utilizes FIST in every model.

Have you ever drilled into your boat's transom only to discover liquid wood? Over time most boats seep water into the wood coring. The wood becomes saturated, adding weight to your boat, and eventually rots. Pro-Line's high density, high compression foam coring material eliminates this problem.

Is Divinycell Coring better than wood? Definitely yes, and the core is completely encapsulated in fiberglass

resulting in a much stronger yet lighter hull. FIST also adds additional rigidity, eliminating rotted wooden stringers that break loose. Plus, all hull compartments are filled with flotation foam adding strength, sound dampening and safety.

All Pro-Lines are constructed of multiple layers of hand laid, bi- and tri- axial woven roving, and other high-tech materials with high grade resins. All models feature MaxGuard Gelcoat for improved shine and resistance to cracking. New and improved gunnel molding has been added for increased protection during docking.

All external upholstery is top grade, UV stable, colorfast low maintenance vinyls. Cushions are removable and fabricated with corrosion and rot free materials.

Because Pro-Line builds the best hull in the industry, we can back it up with the best warranty in the industry. Every 1996 model comes with a Lifetime Hull Structural Warranty that's transferable to the next owner as a 10-year hull warranty!

Member FCA. We support Catch and Release Tournaments. Conserve our fishing resources today to ensure them for tomorrow.

While we endeavor to be as accurate as possible, certain changes in standard equipment, options & the like may have occurred which would not be included in this catalog. This includes, but is not limited to, information relating to fuel capacity, weights, speeds, fuel consumption and overall performance, as they are estimates and could/will vary with each vessel and with each application. Your Pro-Line Dealer is your best source for up-to-date information or specific details about your vessel.

*“Pro-Line Construction - A winning combination
of marine technology and salty traditions.”*

Each Pro-Line boat is a combination of new advances in marine technology and all we've learned during our 28 year history. Design plays an integral part of the construction process. We study each model for the proper placement of everything from fuel tanks to fish boxes. All materials are chosen for their strength to weight ratios and for durability in the marine environment.

Before a Pro-Line leaves

the plant it gets put through “The Hurricane”, just one more challenge in our 32-point plus system of analysis. We check for leaks in anything that could possibly leak. If it turns on or off, we ensure that it is operational. And last of all, we look over every inch of her to make sure she'll carry on the Pro-Line tradition of quality marine craftsmanship.

Everyone at Pro-Line takes exceptional pride in their work. That's why Pro-Line owners take pride in their boats. They understand that to build a strong seaworthy boat it takes knowledge acquired by marine experience, quality materials and craftsmanship and a love for boats and the sea.

MAJOR STANDARD FEATURES

2 Bilge Pumps w/ Automatic Float Switches (1250 GPH Each)
Bow Pulpit with Anchor Roller Davit & Windlass

Cleats, 10" Aft Under Gunnel (2)
Cockpit Lights
Cockpit Shower
Console Cooler
Fishboxes, Port & Starboard Insulated (200 Qts. Each)
Fuel Water Separators
Full Instrumentation (Fuel, MPH, RPM, Temp., Trim, Volts)
Head, Enclosed in Center Console w/Fresh Water Shower & Sink
Instrument Panel w/Resettable Breakers
Ladder, Stainless Steel
Livewell w/Recirculating Pump (50 Gal.)
Self Bailing Cockpit
Transom Door
Transom Sink w/Fresh Water
Trim Tabs

BIMINI CUDDY

Whether you're out to win a Kingfish tournament or just fishing with friends, Pro-Line's 3400 Bimini Cuddy delivers just what you need - speed & room. This hi-performance, off-shore fishing machine has a 9' beam to smooth out whatever path you choose to travel. An oversized center console houses an air-conditioned, stand-up head, while forward is the biggest cuddy cabin in its class. Twin 200 qt. fishboxes and a 50 gal. recirculating transom baitwell will keep you in the fishing action all day and all night long. Capable of holding triple 200 outboards, you'll be out fishing before anyone else leaves port.

Max. HP, O/B500 HP

If going after the really big ones is your idea of fun, this 2950 Mid-Cabin Walkaround is the boat for you. The wide beam makes for a huge fighting cockpit with a deep 31" freeboard that fits a full tournament crew. There's a large transom bait station, built-in tackle drawers, full-sized fish boxes and more. Just about every conceivable fishing feature is close at hand right where you'll need it. Inside the cabin there's lots of room for relaxing in comfort with a few friends. Smartly styled, she's tough at sea and tougher to beat dockside. Perhaps that's why she was voted "Boat of the Year" by Boating Magazine.

WALKAROUND 2510

The 2510 Walkaround is a spacious and comfortable fishing machine. A large cockpit is ready for serious fishermen while the roomy cabin is perfect for entertaining. Boasting an impressive list of standard features, the cabin amenities match a luxurious sport cruiser. Yet outside it's all business for bending rods, tight lines and screeching reels. Few boats this size offer as much fishing room or as many creature comforts. This nicely styled vessel is equally at home hunting offshore or just pleasure cruising the local waterways.

Max. HP, O/B	300 HP
Max. HP, I/O.....	300 HP

Think of all you'd want in a real nice fishing boat - deep, full-sized fish boxes, built in tackle drawers, a transom bait station, a transom door, lots of rod storage and a huge cockpit to work the fish in. Now think of a few items that would be a nice touch - wide walks, a big spacious cabin with an enclosed head, a full galley, a raised helm station with built-in electronics box. Well that's what you get on our new 251 Walkaround, and more. With a smooth, dry, comfortable ride and all the amenities of a much larger boat, your fishing excursions will be the best they can be - whether it's for a day or a very long weekend.

Max. HP, O/B	260 HP
Max. HP, I/O	250 HP

A roomy, bright and airy cabin with galley is just one of the many features that make this Pro-Line a winner with families. Smooth curves and stylish lines flow from the molded bow pulpit, to the wraparound windshield, to the transom bait-station. A large cockpit allows room for huge wet/dry storage below the sliding pedestal seats. Recessed rod storage, 2 tackle drawers, cutting boards, drink holders and more are all standard fare. And like all Pro-Lines, high freeboard surrounds a large cockpit while the deep wide walks make for safe movement about the boat in various sea conditions.

WALKAROUND

An unusually large cabin with a true walkaround, plus all of the extra touches for added comfort is what makes this boat exceptional fare. Visibility is excellent from the raised helm seat and the sleek hull rides fast, high and dry. There's plenty of room for comfortable movement fore and aft. Fishability is designed into every foot of this boat, from the large cockpit with oversized fish boxes, wet/dry storage, cutting boards and more. Very popular with families, this boat is like owning a small lakeside cabin with good sea keeping abilities.

CUDDY FISH

Here's a sleek boat from Pro-Line that turns the concept of comfortable fishing into a fine art. The hull cuts through the water like a marlin. The console is decked with instrumentation and gauges rivaling that of a much larger fishing machine. Standard features are generous. And because she's built by Pro-Line, she fishes like a Pro. Smartly styled and easily maintained, the 220 Cuddy Fish is ideal for every type of water related fun.

One look will tell you this is not your typical fishing boat, a closer look will tell you why. This boat is the next generation in finely detailed fishing craft - from the style of design and the clean rugged surfaces, to a layout that is perfect for scoping out fish, above the water or diving down into the action. Its unique center console boasts a fully-enclosed stand-up head. It's designed to be all sport, all action - right down to the transom door. By looking at her you can tell a lot of design has gone into the layout of this boat. Without a doubt - she looks hot. She performs even hotter.

MAJOR STANDARD FEATURES

- Automatic Float Switch Bilge Pump
- Anchor Locker Storage
- Bow Pulpit w/Roller

SPORTSMAN

SPECIFICATIONS

Length Overall	25'5"
Beam	8'6"
Draft (Hull Only).....	14"
Fuel Capacity O/B	144 Gallons
Hull Weight	3600 Lbs.
Cockpit Area	94 Sq. Ft.
Freeboard.....	29 1/4"
Max. HP, O/B	300 HP

From the full-size center console right down to the broad non-skid deck, this boat is designed for the committed fisherman. With plenty of storage for all your gear, a built-in tackle station, loads of rod storage, and plenty of fish boxes, you can pack it to the gills and still have room for the fish. There's a transom bait station with a 20 gallon livewell and even a transom door. The large center console has an oversized helm to hold all your electronics, and there's even a stand-up head in the console! The 94 sq. ft. cockpit can handle more than a few fishermen working their catch so when the strikes start flying fast and furious, you'll be waiting and ready.

STAKE R

Built exclusively of only high-tech materials, without wood, this is fast becoming one of the most sought after flats boats around. Don't let the sexy styling fool you, this is one serious, skinny-water fishing boat. The ride is quick-to-plane, dry and extremely stable. There are pop-up cleats and pop-up pole holders to keep the deck clear for action. There's an anchor locker, recirculating livewell, wet/dry storage and a large fish box. And, true to her Pro-Line heritage, the large console is well designed, loaded with instrumentation and leaves you with plenty of room to get around.

**“Pro-Line continues its partnership with
a quality engine manufacturer...Mercury Marine.”**

When it comes to setting the standard for performance and reliability, Mercury Marine and Pro-Line have a lot in common. For years, Mercury, Mariner and Force have been dedicated to offering the world's most technologically advanced outboards. Pro-Line and Mercury Marine have again paired up to bring you power packages that add up to one purely untechnical thing: pleasure.

Building on its industry-leading array of 25 engines in 125 different models, ranging from 2.5 to 250 horsepower, Mercury Marine continues to refine its Mariner and Mercury outboard lines for improved efficiency, performance, serviceability and styling in 1996.

Utilizing state-of-the-art technology and time-tested corrosion resistance techniques both inside and out, Mariner and Mercury have quickly gained a reputation as the premier names in the demanding saltwater

environment.

For 1996, Mercury Marine extends its offshore reach all the way from its top-ranked 250-horsepower electronically fuel-injected 3.0 Liter, down to its four cylinder 115-horsepower entry which, along with the 125- and 135-horsepower motors, are now being offered with 25" shaft lengths especially suited for big water use.

With fuel-injected entries in the 250-, 225-, 200- and 150-horsepower categories, Mercury and Mariner clearly lead the technology revolution offshore. All Mariner and Mercury Offshore engines are manufactured with Mercury Marine's exclusive XK-360 low-copper aluminum alloy. Developed in 1969 and still unmatched by rival outboard builders, XK-360 provides premium corrosion resistance and works in conjunction with the company's premier stainless steel propshafts, driveshafts, and electro deposition paint and primer coatings.

If you're looking for a more economical source of power, consider Force. Force outboards are built by Mercury Marine and offer the value conscious boater excellent all around performance at a very affordable price.

Your Pro-Line dealer can help you pick the right boat package for your needs. Whichever engine you choose, Mercury, Mariner or Force, you can rest assured that your new Pro-Line is powered by the most dependable and best performing marine power available.

"Pro-Line has partnered with two more quality engine manufacturers...Johnson and Evinrude."

Quality. It's a commitment made by everyone at Johnson/Evinrude, Pro-Line and their Dealer Network. For over 70 years, Johnson and Evinrude have pioneered the technology you'll find in the world's best engines. That technology is brought to you using the most advanced design and manufacturing techniques available. For 1996, you'll find OMC outboard models available for a myriad of boating applications; outboards designed to offer you the best in boating. You'll also find the names that have built OMC's reputation for reliability and performance: Johnson OceanRunner®, FastStrike®, Venom™; Evinrude OceanPro®, Intruder® and Vindicator™. From 2 to 225HP, any outboard you need.

**115HP FastStrike®/
Intruder®**

All the features of the legendary 150/175 HP V6 FastStrike/Intruder outboards are available in a 60° V4! The OIS 2000 Optical Ignition System, vapor separator and Power Path™ induction system make the new loop-charged, 115 HP FastStrike/Intruder the most technology advanced V4's in the world!

**90/115HP OceanRunner®/
OceanPro®**

More stainless steel. Electro-deposition coatings. A patented relieved splitline gearcase. All the corrosion-fighting features of the OceanRunner/OceanPro outboards are now available in two V4 models. These loop-charged V4's also offer you all the advanced technology of our FastStrike/Intruder V6's.

The one person to bring you all this performance and reliability is your Pro-Line and Johnson/Evinrude dealer. Your dealer can help you select the outboard for your Pro-Line, as well as the parts and accessories you need to get the most out of your time on the water.

After your purchase, you can count on your dealer to support your investment, because your dealer is supported by Johnson's and Evinrude's large marine network. As any boater will tell you, experience makes all the difference.
