

PRO LINE
BOATS

A Letter From Mike Collins, Lee Kimmell, Mac Spencer, and Dan Atwood

It's been 28 years since Pro-Line put its first boat in the water. During that time, a lot has changed in the way boats are designed, built and used. We're proud of the fact that during this time, Pro-Line has been at the forefront of product development and innovative designs.

Nowhere is this more evident than with our all new 2810 Walkaround - a boat that showcases today's thinking

in a sport fishing boat that crosses over to a luxury weekend cruiser. You'll also notice that all our 1997 models feature new graphics, reflecting the decorum of today's contemporary look.

We're in our third year utilizing F.I.S.T. construction, a hi-tech boat-building process that eliminates wood and all the problems associated with wood construction. We're setting record level customer service and satisfaction indexes, and more of you are recommending Pro-Line to a friend than any other time in our history.

While this may say a lot for our boats, it also says a lot for how we're meeting the demanding needs of today's recreational fisherman and

their families. From owners clubs, to newsletters, fishing teams and fishing tournaments, we're dedicated to ensuring that your enjoyment goes beyond a great day on the water. We see to it that you become part of our family, and we want you to get all the benefits that come with it.

We personally extend an invitation for you to see the 1997 line of Pro-Line Boats at your nearest dealer. If you're ever in Crystal River, Florida, please visit our facilities and we'll give you a personal tour of the plant. You'll discover why Pro-Line is the number one choice of America's fisherman.

"The Number One Choice of America's Fishermen"

We are particularly proud that Pro-Line builds and sells more rough water and offshore fiberglass fishing boats than anyone in America. Every Pro-Line is designed from the hull up to maximize the quality of construction, maximize the owner benefits and maximize the boat's value.

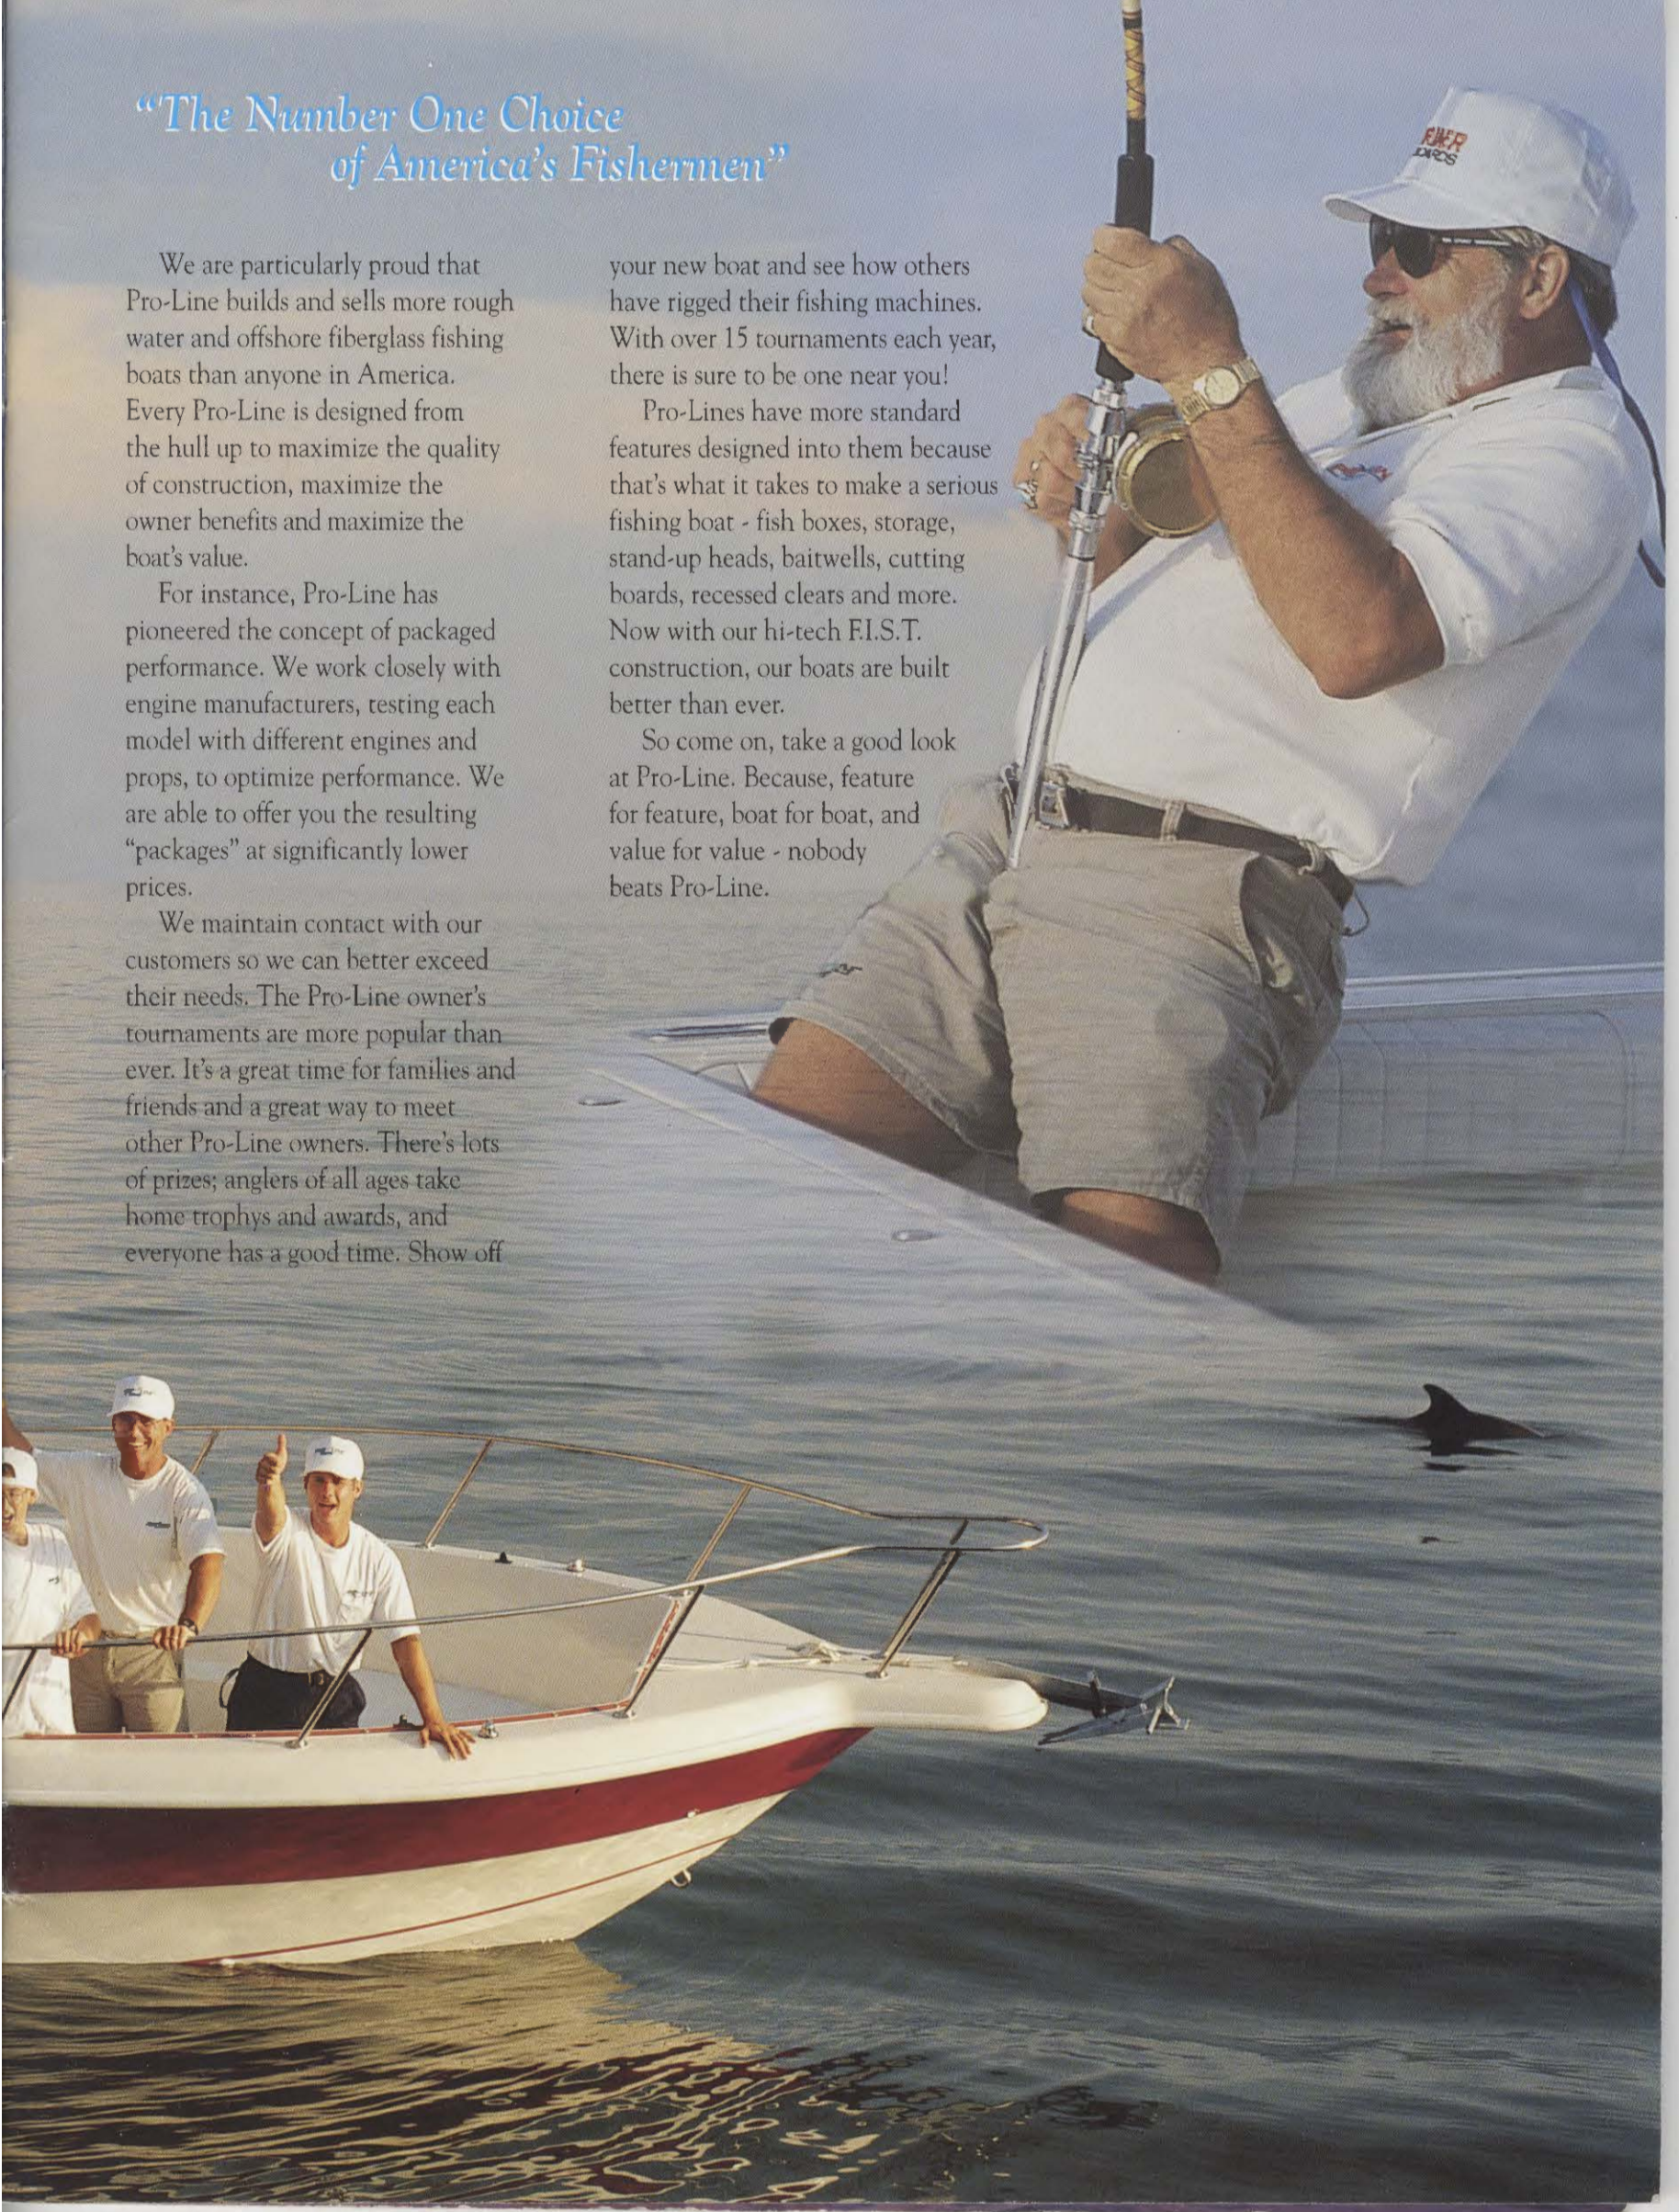

For instance, Pro-Line has pioneered the concept of packaged performance. We work closely with engine manufacturers, testing each model with different engines and props, to optimize performance. We are able to offer you the resulting "packages" at significantly lower prices.

We maintain contact with our customers so we can better exceed their needs. The Pro-Line owner's tournaments are more popular than ever. It's a great time for families and friends and a great way to meet other Pro-Line owners. There's lots of prizes; anglers of all ages take home trophies and awards, and everyone has a good time. Show off

your new boat and see how others have rigged their fishing machines. With over 15 tournaments each year, there is sure to be one near you!

Pro-Lines have more standard features designed into them because that's what it takes to make a serious fishing boat - fish boxes, storage, stand-up heads, baitwells, cutting boards, recessed clears and more. Now with our hi-tech F.I.S.T. construction, our boats are built better than ever.

So come on, take a good look at Pro-Line. Because, feature for feature, boat for boat, and value for value - nobody beats Pro-Line.

“Pro-Line Construction - A winning combination of marine technology and salty traditions.”

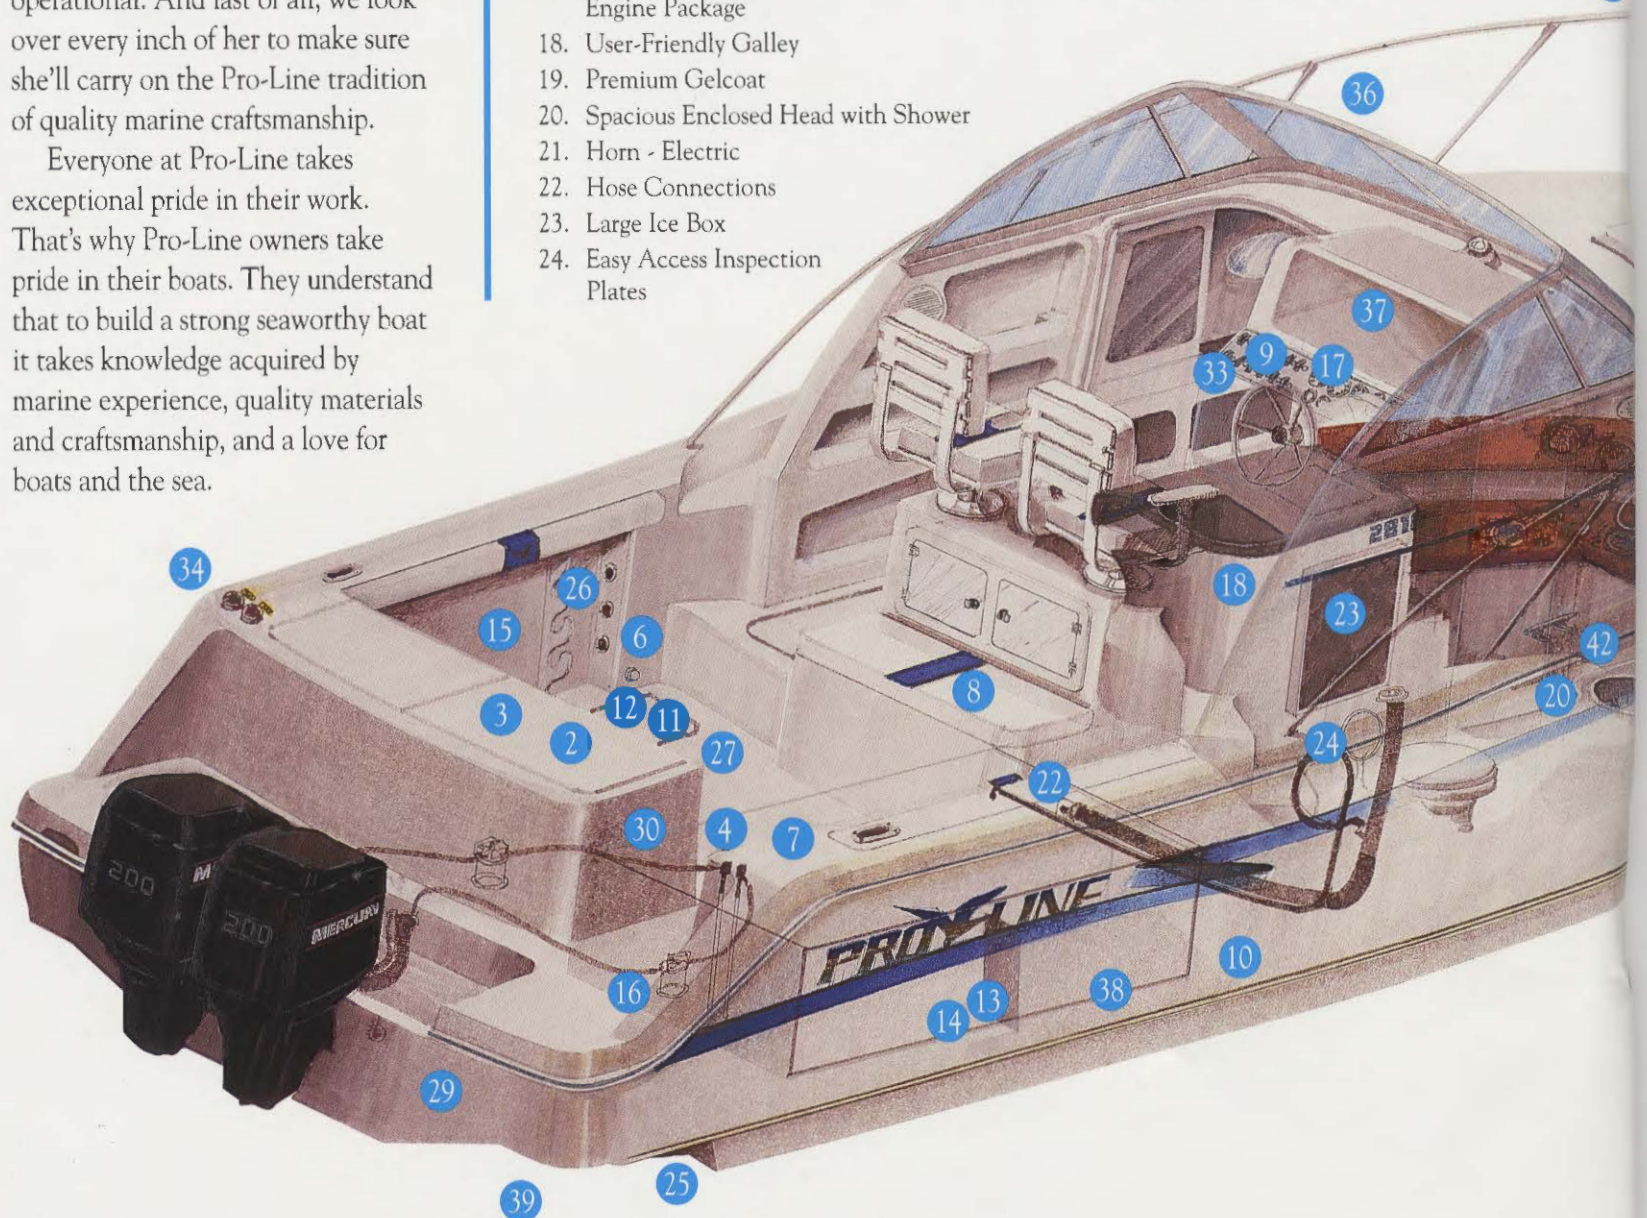

Each Pro-Line boat is a combination of new advances in marine technology and everything we've learned during our 28 year history. Design plays an integral part of the construction process. We study each model for the proper placement of everything from fuel tanks to fish boxes. All materials are chosen for their strength-to-weight ratios and for durability in the marine environment.

Before a Pro-Line leaves the plant it gets put through “The Hurricane”, just one more challenge in our 32-point plus system of analysis. If it turns on or off, we ensure that it is operational. And last of all, we look over every inch of her to make sure she'll carry on the Pro-Line tradition of quality marine craftsmanship.

Everyone at Pro-Line takes exceptional pride in their work. That's why Pro-Line owners take pride in their boats. They understand that to build a strong seaworthy boat it takes knowledge acquired by marine experience, quality materials and craftsmanship, and a love for boats and the sea.

Features

1. Anchor and Rope Locker Storage
2. Insulated Baitwell
3. Overboard Baitwell Drains
4. Automatic Bilge Pump w/ Sure Bail Automatic Float Switch (1250 GPH)
5. Molded Bow Pulpit
6. Marine Cockpit Lights
7. Cockpit Shower (Inside Wall)
8. 32 oz. UV Protected Vinyl Cushions
9. Dash Panel with Resettable Breakers
10. Hand Laid Knitted Biaxle Fiberglass
11. Insulated Fish/Storage Boxes
12. Fish/Storage Boxes Drain Overboard
13. F.I.S.T. - Fiberglass Integrated Structural Technology
14. Closed Cell Flotation Foam
15. Deep Interior Freeboard
16. Fuel Water Separator
17. Full Instrumentation with Engine Package
18. User-Friendly Galley
19. Premium Gelcoat
20. Spacious Enclosed Head with Shower
21. Horn - Electric
22. Hose Connections
23. Large Ice Box
24. Easy Access Inspection Plates
25. Reverse Chines System
26. Recessed Rod Racks
27. Self Bailing Cockpit
28. Thru Bolted Stainless Steel (316L) Hardware
29. High Density Foam Transom
30. Walk Through Transom Door
31. Walkaround Cabin
32. 10 Year Transferrable Hull Warranty
33. Wiring with Heat Shrink Connections
34. Remote Oil Fill
35. Stainless Steel Welded Bow Rail
36. Windshield
37. Electronics Box
38. Fuel Tank
39. Deep-V Bottom
40. Upgraded Rub Rail
41. Oversized V-Berth
42. Molded Cabin Innerliner

“Pro-Line introduces a new measure of quality - with FIST”

FIST (Fiberglass Integrated Structural Technology) is a superior boat building process that utilizes a fiberglass stringer system and high density foam coring in place of wood. It's the highest standard for the construction of rugged fishing boats and only Pro-Line utilizes FIST in every model.

Have you ever drilled into your boat's transom only to discover liquid wood? Over time most boats seep water into the wood coring. The wood becomes saturated, adding weight to your boat, and eventually rots. Pro-Line's high density, high

compression foam coring material eliminates this problem.

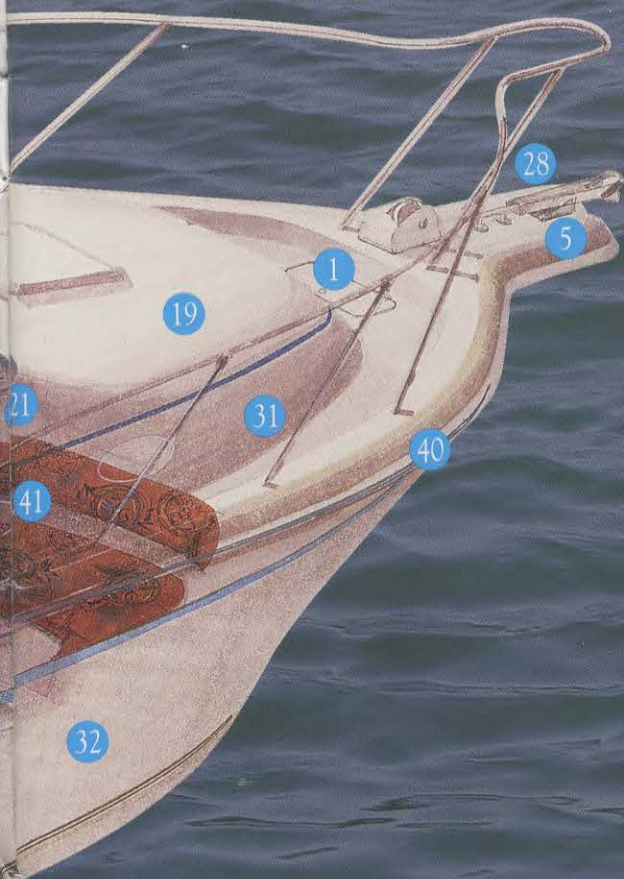

Is foam coring better than wood? Definitely yes, and the core is completely encapsulated in fiberglass resulting in a much stronger yet lighter hull. FIST also adds additional rigidity, eliminating rotted wooden stringers that break loose. Plus, all hull compartments are filled with flotation foam adding strength, sound dampening and safety.

All Pro-Lines are constructed of multiple layers of hand laid, bi- and tri- axial woven roving, and other high-tech materials with high grade resins.

All models feature premium gelcoats for improved shine and resistance to cracking. New and improved gunnel molding has been added for increased protection during docking. All external upholstery is top grade, UV stable, colorfast low maintenance vinyls. Cushions are removable and fabricated with corrosion and rot free materials.

Because Pro-Line builds the best hull in the industry, we can back it up with the best warranty in the industry. Every 1997 model comes with a 10 Year Transferrable Hull Warranty.

F.I.S.T. - Tomorrow's technology today!

“Each Pro-Line Walkaround offers the features and amenities of a much larger boat.”

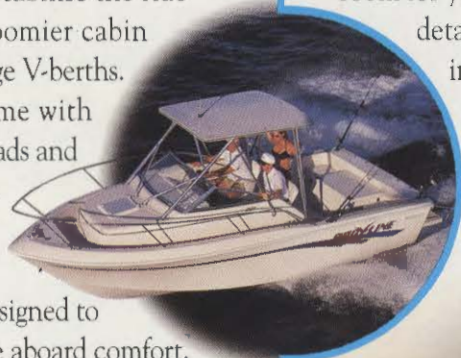

From the biggest hull on down, each Pro-Line Walkaround is designed to offer you the features and amenities of a much larger boat. The cabins are fully dressed, offering you a choice of the latest fabrics and colors. Wider beams not only stabilize the ride they make for roomier cabin interiors with large V-berths. Most models come with true, stand-up heads and full galleys with ample storage.

A Pro-Line Walkaround is designed to offer you true live aboard comfort. Cross ventilation is designed in. There's lots of storage. Interior fabrics and surfaces are chosen to be low maintenance and easy-to-clean.

Each Pro-Line is designed to be every inch a rugged fisherman and every bit a stylish, easily maintained cruiser. Pro-Line Walkarounds have deep, wide walks with molded-in, non-skid runways. Pro-Line Walkarounds also have high freeboards and spacious cockpits just loaded with full-size fish boxes,

lure cabinets, storage, rod racks and more. Select models offer a well designed bait and tackle station. The wraparound windshields protect a broad, well designed helm area with full instrumentation and plenty of room for your electronics. All of the details and more are designed in, right down to a pair of self-draining drink holders.

Take a good look at one of the Pro-Line Walkarounds, you'll find she's a smartly styled, quality built fishing boat - top to bottom, inside and out.

EXPRESS 3250S

Due later this model year, a magnificent boat engineered and designed for the fishing enthusiast and for the avid boating family. Guaranteed to set new standards in the industry, the 3250 will be tough to beat. With its incredible list of standard features and amenities, you will be hard pressed to find better anywhere. The well thought-out command station overlooks a huge, spacious cockpit. While below the deck, a family of six can sleep in its luxurious and expansive cabin loaded with creature comforts, including a large stand-up head, full galley, TV with VCP, microwave and more. Be on the lookout for the boat that has taken over 28 years to create!

WALKAROUND

A roomy, bright and airy cabin with galley is just one of the many features that make this Pro-Line a winner with families. Smooth curves and stylish lines flow from the molded bow pulpit, to the wrap-around windshield, to the transom bait-station. A large cockpit allows room for huge wet/dry storage below the sliding pedestal seats. Recessed rod storage, 2 tackle drawers, cutting boards, drink holders and more are all standard fare. And like all Pro-Lines, high freeboard surrounds a large cockpit while the deep wide walks make for safe movement about the boat in various sea conditions.

CUDDY FISH

Here's a sleek boat from Pro-Line that turns the concept of comfortable fishing into a fine art. The hull cuts through the water like a marlin. The console is decked with instrumentation and gauges rivaling that of a much larger fishing machine. Standard features are generous. And because she's built by Pro-Line, she fishes like a Pro. Smartly styled and easily maintained, the 220 Cuddy Fish is ideal for every type of water related fun.

WALKAROUND

An unusually large cabin with a true walkaround, plus all of the extra touches for added comfort is what makes this boat exceptional fare. Visibility is excellent from the raised helm seat and the sleek hull rides fast, high and dry. There's plenty of room for comfortable movement fore and aft. Fishability is designed into every foot of this boat, from the large cockpit with oversized fish boxes, wet/dry storage, cutting boards and more. Very popular with families, this boat is like owning a small lakeside cabin with good sea keeping abilities.

WALKAROUND 201

Smooth curves and clean lines topside with a large, airy cabin below deck make this boat a great choice in a smaller walkaround. But from that point on she's a big craft by anyone's standards. The raised helm with sliding pedestal seats also features 2 large fishboxes that can double as wet/dry storage. There are removable jump seats to the rear of the 29 square foot fighting cockpit. A built-in tackle box is located underneath the port drink holders. A large companionway door opens on a big, well lit, cabin and full-sized v-berth with comfortable, oversized cushions. The 201- she wrote the book on value, comfort and fishability.

PRO-LINE

“When we say, ‘A Pro-Line Sportsman is built by fishermen for fishermen’ - we mean every word.”

Earlier we told you about how well a Pro-Line is built. Here's why every Pro-Line fishes like a pro. First there's getting to the fish. The hull of your Pro-Line is designed to respond. Deep-V's cut the chop while wide reversed chines direct the water flow back and out. If it's a wet surface we consider the shape of every inch. Hull designs are calculated to give each boat the proper lift, stabilization and positive response to control.

Now get on a Pro-Line and look around you. This is what you'll see - the gunnel has clean unobstructed surfaces. Under the gunnel there is plenty of rod storage. Customized

fishing features are everywhere - wash downs, cutting boards, livewells, tackle drawers, fully equipped bait stations, transom doors and more - all designed, boat by boat, to be close at hand, ready to go.

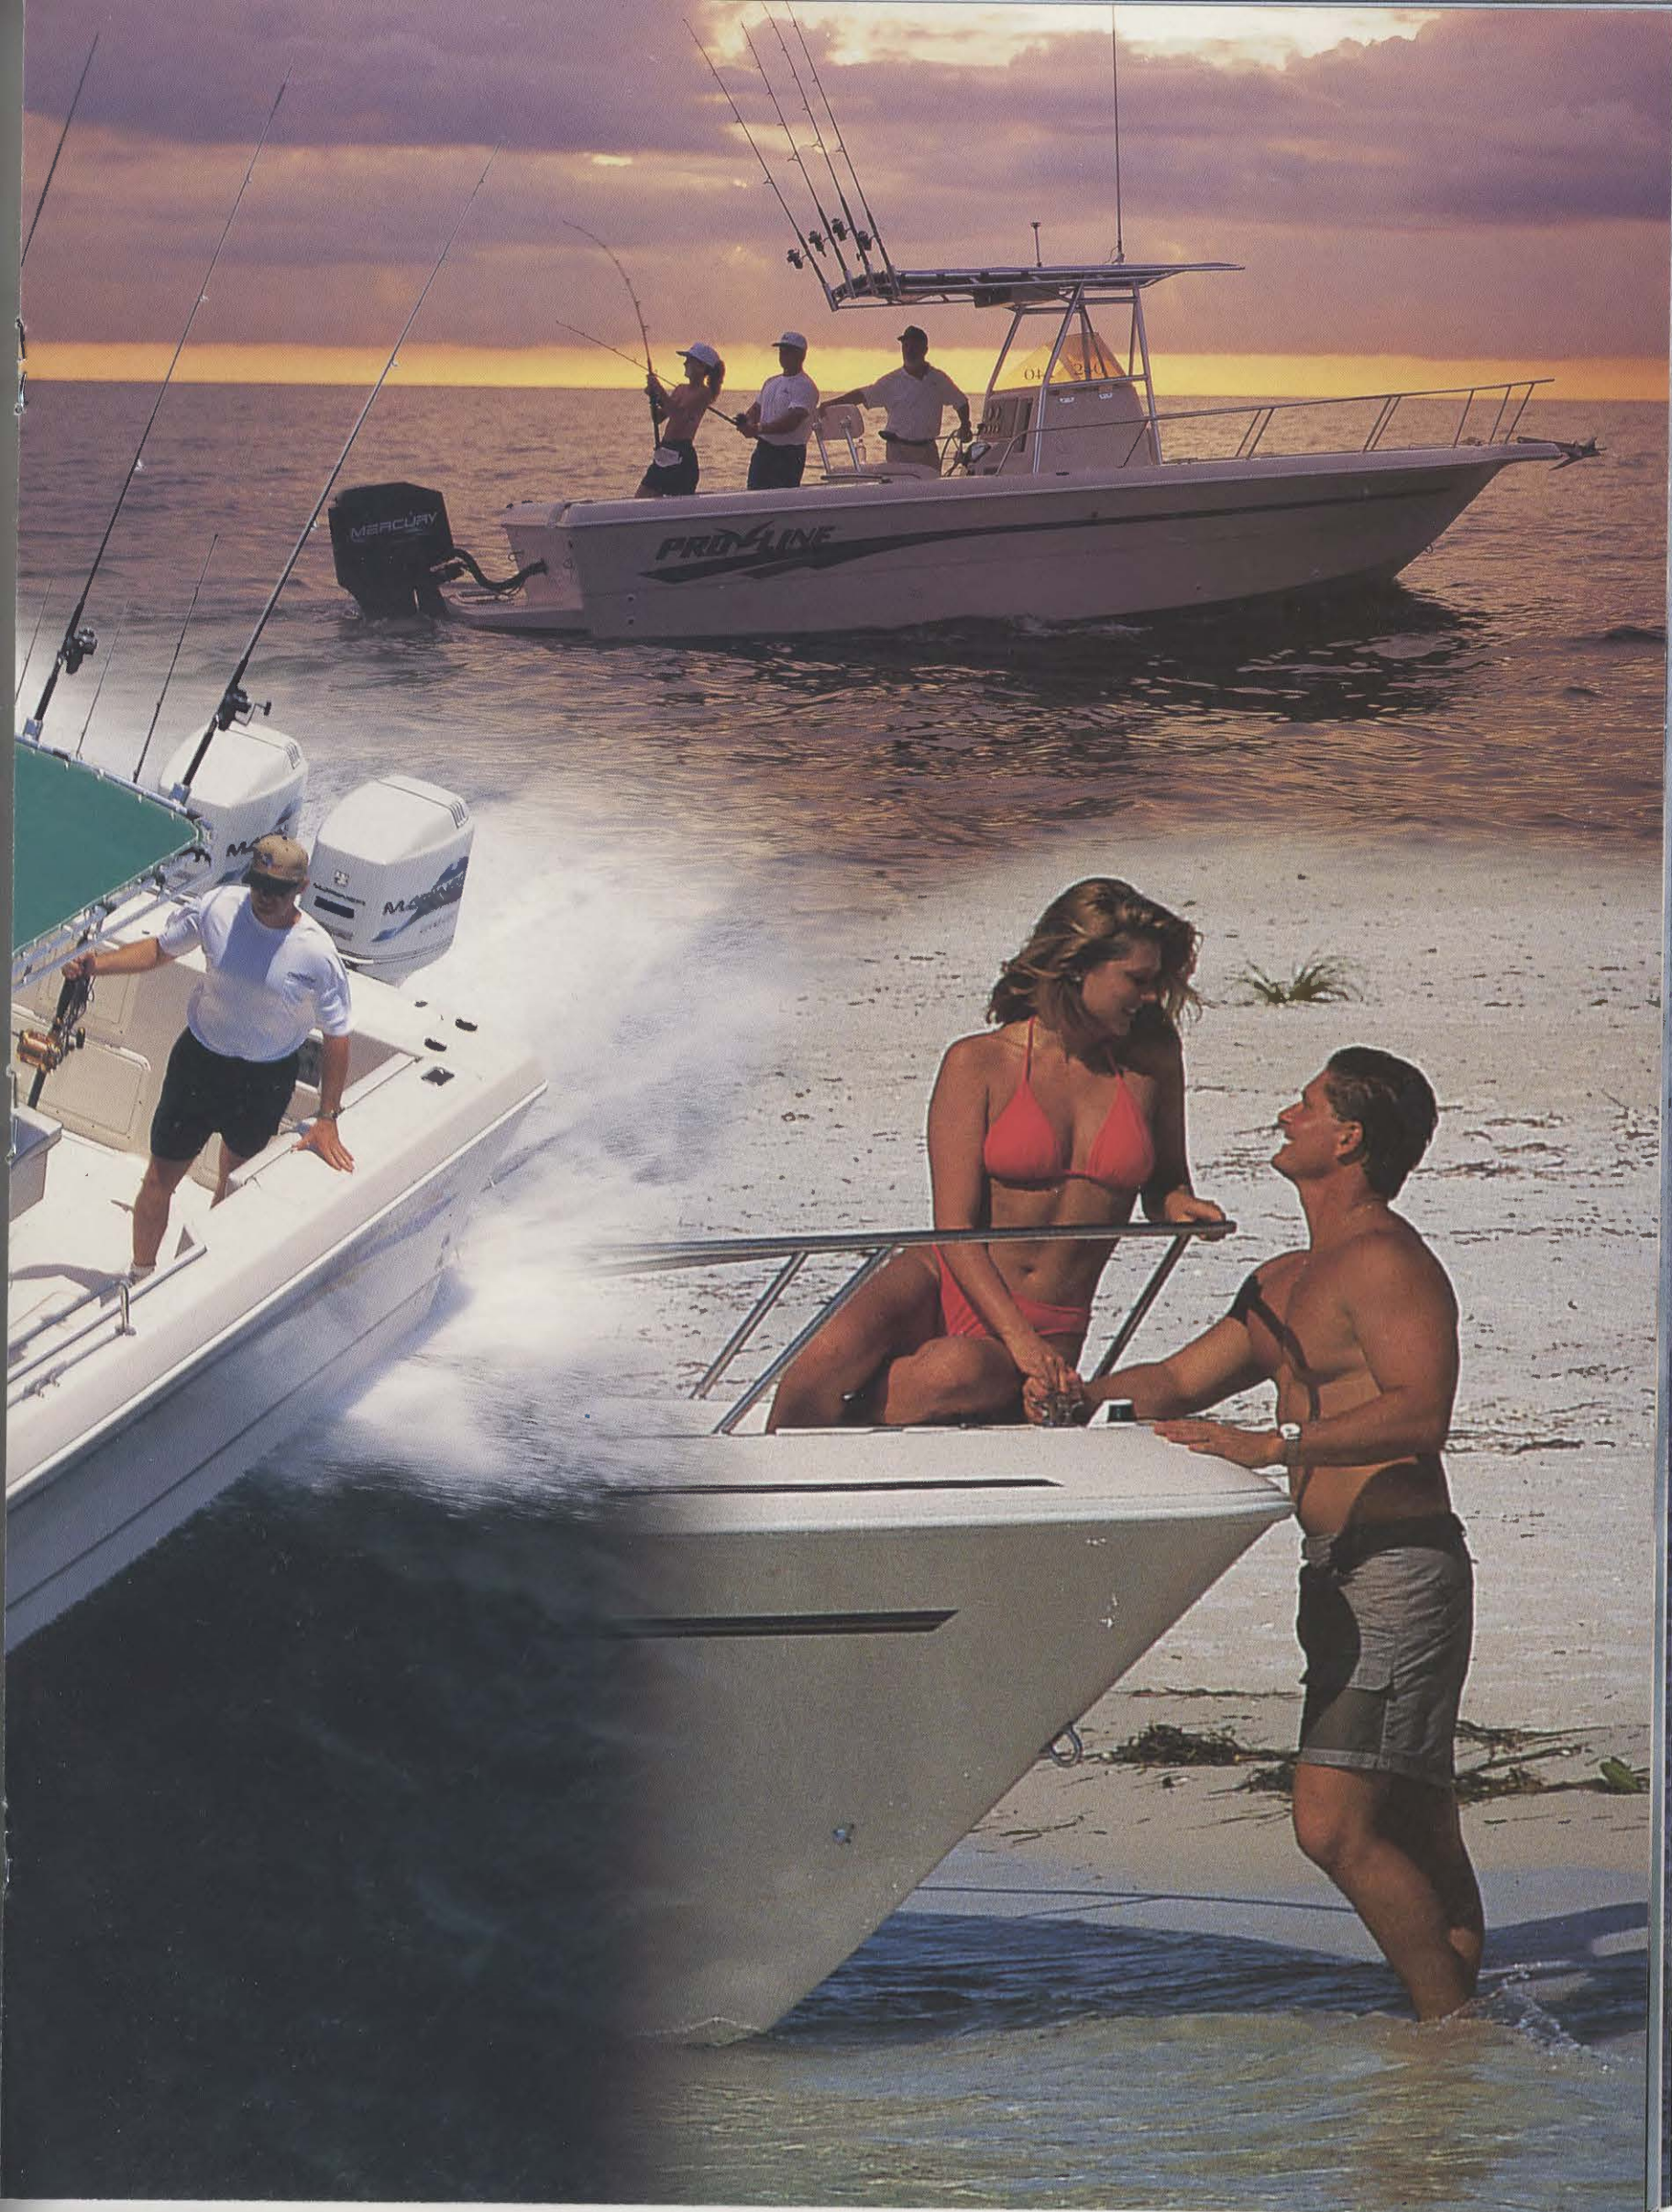

Look at the cockpit - there's lots of room no matter what Pro-Line you choose.

Non-skid surfaces are molded into the deck. All stainless steel hardware is welded and backplated for rugged

off-shore conditions. Freeboard is deep while protruding corners and sharp surfaces are minimized - true fishermen know hot action calls for clean, tight lines.

Now the real test, open up the fish boxes, if they're big and deep they're on a Pro-Line.

MAJOR STANDARD FEATURES

2 Bilge Pumps w/ Automatic Float Switches (1250 GPH Each)
Bow Pulpit with Anchor Roller Davit & Windlass

BIMINI CUDDY

Whether you're out to win a Kingfish tournament or just fishing with friends, Pro-Line's 3400 Bimini Cuddy delivers just what you need - speed & room. This hi-performance, off-shore fishing machine has a 9' beam to smooth out whatever path you choose to travel. An oversized center console houses a stand-up head, while forward is the biggest cuddy cabin in its class. Twin 200 qt. fishboxes and a 50 gal. recirculating transom baitwell will keep you in the fishing action all day and all night long. Capable of holding triple 225HP outboards, you'll be out fishing before anyone else leaves port.

One look will tell you this is not your typical fishing boat, a closer look will tell you why. This boat is the next generation in finely detailed fishing craft - from the style of design and the clean rugged surfaces, to a layout that is perfect for scoping out fish, above the water or diving down into the action. Its unique center console boasts a fully-enclosed stand-up head. It's designed to be all sport, all action - right down to the transom door. By looking at her you can tell a lot of design has gone into the layout of this boat. Without a doubt - she looks hot. She performs even hotter.

SPORTSMAN

The new 210 Sportsman is one serious fishing boat. The large center console has a lockable dash for your electronics as well as a built-in tackle station. A molded in forward console seat has storage in addition to all the fish boxes and wet/dry storage throughout the boat. There's plenty of rod storage and the 80 sq. ft. cockpit leaves you plenty of room to fight the big ones. Plus with Pro-Line's proven hull design, this is one 21-footer that'll get you to the fish fast. If you're looking for a serious fishing machine with all the big fishing features in a trailerable boat, then your ship has just come in.

- Seats - Aft Jump
- Self Bailing Cockpit
- Tackle Box - Built In
- Tempered Glass Windshield
- 10 Year Transferrable Hull Warranty

SPORTSMAN
202

Successfully combining a fishing boat and a runabout, this boat fits nicely with those who want to divide their time between fishing, skiing, snorkeling and diving. In the drivers side console there's a lockable electronics box, while the portside console has a built-in ice bin. Behind each pedestal seat is an insulated baitwell/storage box that drains overboard. Rod racks are mounted behind each gunnel and there are 2 removable jump seats to the rear of the self bailing cockpit. It's two, two, two boats in one.

SPECIFICATIONS

Length Overall	20'2"
Beam	8'0"
Hull	Deep V
Draft	
Engine Up	12"
Engine Down	20"
Fuel Capacity	70 Gallons
Hull Weight (Approx.)	2500 Lbs.
Cockpit Area	29.25 Sq. Ft.
Cockpit Depth	22.5"
Bridge Clearance (No Top)	6'2"
Max. HP, O/B	175 HP

MAJOR STANDARD FEATURES

Anchor and Rope Locker Storage
 Battery Tray
 Bilge Pump (1250 GPH) and Automatic Float Switch
 Casting Deck Fish/Storage Box, Insulated
 Center Console w/ Storage
 Cleats 8" (3)
 Control Binnacle
 Dash Panel w/ Resettable Breakers
 Divinycell Foam Core Transom
 F.I.S.T. Stringer System
 Flotation Foam (Closed Cell)
 Fuel/Water Separator
 Full Instrumentation (Fuel, MPH, RPM, Temp., Trim, Volts)
 Garboard Drain

 Navigation Lights
 Plexiglass Windshield
 Rod Racks (6 Rod Cap.)
 Seats - Aft Jump
 Self Bailing Cockpit
 Tackle Box - Built In
 10 Year Transferrable Hull Warranty

SPORTSMAN

Here's a sleek boat from Pro-Line that fits a limited budget without limiting what you get. The large, forward raised casting platform holds a huge insulated fish box that doubles as wet/dry storage. The center console contains full instrumentation, extra storage, as well as a built-in, 3 drawer tackle box. Rod racks beneath each gunnel hold up to 6 rods and reels. And the 97 square foot fighting cockpit is backed with 2 removable jump seats. The 200 Sportsman is designed to give choices, not compromises.

SPORTSMAN

Introducing the 17 foot fishing boat with enough room to swallow any other 17 foot boat on the market. Forward is a large, raised casting platform holding a huge insulated fish box that doubles as wet/dry storage. A stylish molded center console contains everything from full instrumentation to drink holders and extra storage space. There is more storage on each side of the transom and 50 square feet of cockpit space. The freeboard is a full 22 inches for a safe dry ride. This boat proves that thrills can come in any size.

Draft (Hull Only)	9"
Fuel Capacity	45 Gallons
Cockpit Area	30 Sq. Ft.
Hull Weight	1170 Lbs.
Freeboard	11"
Max.HP, O/B	200 HP

Built exclusively of only high-tech materials, without wood, this is fast becoming one of the most sought after flats boats around. Don't let the sexy styling fool you, this is one serious, skinny-water fishing boat. The ride is quick-to-plane, dry and extremely stable. There are pop-up cleats and pop-up pole holders to keep the deck clear for action. There's an anchor locker, recirculating livewell, wet/dry storage and a large fish box. And, true to her Pro-Line heritage, the large console is well designed, loaded with instrumentation and leaves you with plenty of room to get around.

MAJOR STANDARD FEATURES

Battery Tray
 Bilge Pump (1250 GPH) and
 Automatic Float Switch

SPORTSMAN 180

This modified V-bottom boat is the perfect choice for back bay and shallow water fishing. Forward is a casting deck with a large, insulated fish box underneath. The center console has full instrumentation, extra storage space, vertical rod racks, and a built-in, 3 drawer tackle box to keep hooks, lures and weights out of the way yet close at hand. Behind the console is a 76 quart cooler seat that comes standard with a flip flop cushioned back rest. There are 2 additional insulated fish boxes located in the transom that can double as extra seating or raised casting areas. This bay boat is just flat-out better.

Bridge Clearance (No Top)	4'7"
Max. HP, O/B	120 HP

*“Pro-Line continues its partnership with
a quality engine manufacturer...Mercury Marine.”*

When it comes to setting the standard for performance and reliability, Mercury Marine and Pro-Line have a lot in common. For years, Mercury, Mariner and Force have been dedicated to offering the world's most technologically advanced outboards. Pro-Line and Mercury Marine have again paired up to bring you power packages that add up to one purely untechnical thing: pleasure.

Building on its industry-leading array of 125 different models, ranging from 2.5 to 250 horsepower, Mercury Marine continues to refine its Mariner and Mercury outboard lines for improved efficiency, performance, serviceability and styling in 1997.

New this year is the all new 200 DFI models (direct fuel injection). They're a total departure in outboard design. These engines offer fuel savings of up to 80%, smoother

idle, quick reliable starts, and virtually smoke free operation.

Utilizing state-of-the-art technology and time-tested corrosion resistance techniques both inside and out, Mariner and Mercury have quickly gained a reputation as the premier names in the demanding saltwater environment.

Mercury Marine's offshore line-up ranges from our top-ranked 250-horsepower electronically fuel-injected 3.0 Liter, down to its four cylinder 115-horsepower entry which, along with the 125- and 135-horsepower motors, are now being offered with 25" shaft lengths especially suited for big water use.

With fuel-injected entries in the 250-, 225-, 200- and 150-horsepower categories, and our all new 200 DFI, Mercury and Mariner clearly lead the technology revolution offshore.

If you're looking for a more economical source of power, consider Force. Force outboards are built by Mercury Marine and offer the value conscious boater excellent all around performance at a very affordable price.

Your Pro-Line dealer can help you pick the right boat package for your needs. Whichever engine you choose, Mercury, Mariner or Force, you can rest assured that your new Pro-Line is powered by the most dependable and best performing marine power available.

**MERCURY
MARINE**

“Pro-Line has partnered with two more quality engine manufacturers...Johnson and Evinrude.”

Quality. It's a commitment made by everyone at Johnson/Evinrude, Pro-Line and their Dealer Network. For over 70 years, Johnson and Evinrude have pioneered the technology you'll find in the world's best engines. That technology is brought to you using the most advanced design and manufacturing techniques available. For 1997, you'll find OMC outboard models available for a myriad of boating applications; outboards designed to offer you the best in boating. You'll also find the names that have built OMC's reputation for reliability and performance: Johnson OceanRunner®, FastStrike®, Venom®; Evinrude OceanPro®, Intruder® and Vindicator®. From 2 to 225HP, any outboard you need.

**115HP FastStrike®/
Intruder®**

All the features of the legendary 150/175 HP V6 FastStrike/Intruder outboards are available in a 60° V4! The OIS 2000 Optical Ignition System, vapor separator and Power Path™ induction system make the new loop-charged, 115 HP FastStrike/Intruder the most technology advanced V4's in the world!

**90/115HP OceanRunner®/
OceanPro®**

More stainless steel. Electro-deposition coatings. A patented relieved splitline gearcase. All the corrosion-fighting features of the

OceanRunner/OceanPro outboards are now available in two V4 models. These loop-charged V4's also offer you all the advanced technology of our FastStrike/Intruder V6's.

The one person to bring you all this performance and reliability is your Pro-Line and Johnson/Evinrude dealer. Your dealer can help you select the outboard for your Pro-Line, as well as the parts and accessories you need to get the most out of your time on the water.

After your purchase, you can count on your dealer to support your investment, because your dealer is supported by Johnson's and Evinrude's large marine network. As any boater will tell you, experience makes all the difference.

“Pro-Line Options & Accessories- With all of the standard features built into each Pro-Line, you'll have plenty of room in your budget for those extra personal touches.”

Every Pro-Line is designed to be ready to fish from the first time you leave the dock. Anchor lockers, automatic bilge pumps, cutting boards, drink holders, fish boxes and more- each hull is maximized to the fullest extent so that you'll get as much enjoyment as possible when you're out on the water. But with fishermen being as particular about their boats as they are, we offer a wide variety of options, accessories and special low cost option packages to further customize your new Pro-Line boat.

We are constantly on the lookout for options and accessories that are attractively styled, sturdy, well thought-out, designed and built with quality materials, and reasonably priced. In fact, compared with most suggested retail prices, a

Pro-Line option package saves you so much money, it's like getting certain equipment free. Be sure to ask your Pro-Line dealer for anything you'd like so you can rig your new Pro-Line exactly how you want it - for more comfort, utility, fishability and convenience.
