EXPRESS • WALK • SUPER SPORT • SPORT • BAY • DUAL CONSOLE

BUILT BY FISHERMEN FOR FISHERMEN

DAN ATWOOD

My father and I started Pro-Line over 37 years ago with the idea of building the very best fishing boats on the water. Never in our wildest dreams could we have envisioned being where we are today... America's #1 choice of fishing boats. We hope that you'll enjoy your new Pro-Line as much as we enjoy building them for you.

In 1968, when Pro-Line launched its first boat in the tranquil waters off Crystal River, Florida, little did anyone know that 38 years later they would dominate the fishing boat market as the number one manufacturer of fish boats in its class. Our motto "Built By Fishermen for Fishermen" is a powerful testament to the mission of delivering the finest fleet of fishing machines representing quality, value and fishability.

Today Pro-Line Boats builds 23 models from 17 to 35 feet, virtually covering all aspects of the fishboat market. The Sport and Super Sport models are reputed to be some of the finest center console fishing machines around, offering an unmatched combination of performance and fighting space with ergonomic fishing features. The Walk models consistently set new industry standards for affordability, room and comfort. The Bay boats offer backwater fishability with deepwater construction. The Dual-Console models meet the needs of the crossover angler who, when not fishing, enjoys diving, skiing, and other water related activities. Pro-Line's new Express series has taken the traditional Sportfishing boat to a new level of design, functionality, and live aboard amenities.

When it comes to safety, Pro-Line puts you and your family first. All Pro-Line Boats exceed NMMA (National Marine Manufacturers Association), U.S. Coast Guard and European CE standards. They're built using the highest quality components available today and utilize a wood-free construction process called F.I.S.T, Fiberglass Integrated Structural Technology. Pro-Line's are built to withstand the rigors of bluewater conditions and they also have some of the best resale value in the market.

Pro-Line has been recognized many times over, winning numerous awards for their designs and quality. In fact, Pro-Line Boats is the proud recipient of 4 consecutive NMMA Awards for Excellence in Customer Satisfaction for Fiberglass Outboard Boats. And while Pro-Line has grown to be a large manufacturer, you will discover that they've never forgotten their hometown roots. When you own a Pro-Line, you become a part of the Pro-Line family.

So if you're looking for a boat that meets the needs of today's fisherman and his family, take a close look at Pro-Line. Climb aboard, look around, open the hatches, sit in the captain's seat and put our boats to the test. When it come to quality, value, innovation and fishability, feature for feature nobody beats a Pro-Line. After all, they're built by fishermen... just for you.

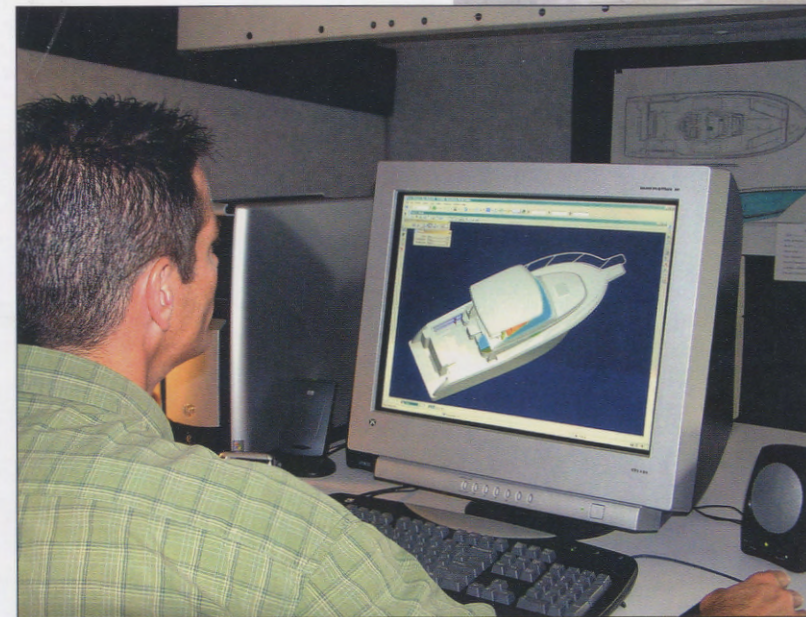

At Pro-Line, we know what you expect from a day on the water - enjoyment. That's why we build every boat with your enjoyment and safety in mind. Each Pro-Line built utilizes a combination of new advances in marine technology and all we've learned in our 38 year history.

All 2006 models feature Pro-Line's FIST construction. FIST, Fiberglass Integrated Structural Technology, is a superior boat building process that utilizes a fiberglass integrated stringer system, high-density foam and composite coring in place of wood. The result is a hull that's stronger with superior structural integrity. FIST also adds rigidity, eliminating wooden stringers. Plus, all hull compartments are filled with flotation foam adding strength, sound dampening and safety. It's the highest standard for the construction of rugged fishing boats on the water today. A proud, safety conscious partner of NMMA, Pro-Line far exceeds industry construction standards and requirements.

All models are constructed of multiple layers of hand laid, bi-axial, tri-axial and woven roving fiberglass, high-grade resins and additional hi-tech materials. All Pro-Lines feature premium gelcoat for improved shine and fade resistance. New and improved gunnel molding has been added for increased protection. All external upholstery is top grade, 32-oz, UV stable, colorfast low maintenance vinyl. All cushions are fabricated with corrosion and rot-free materials. All hardware is made from marine-grade stainless steel. The hull and deck are bonded together both chemically and mechanically, and all hardware is thru-bolted with backing plates and aircraft locking nuts.

With more than 32 quality control system and safety checks, Pro-Line makes sure everything is operational so your first day on the water is everything you expect it to be.

Pro-Line boats are built to exceed NMMA, U.S. Coast Guard and European CE standards. That's why we can offer a 10-year, non-prorated and transferrable hull warranty standard on every boat. So when it comes to resale, safety, dependability and quality, Pro-Line Boats delivers.
